

Microsoft Team Integrations

Firstly Create the team

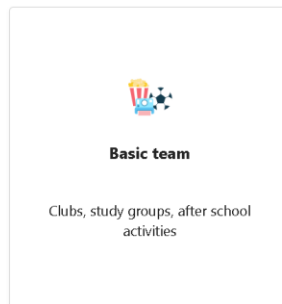

Go to teams → Click Join or create team

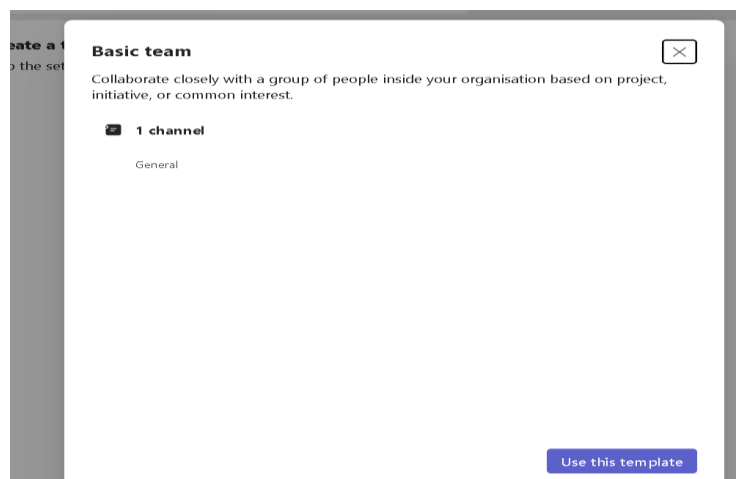

Click Basic tea

Create a team from a template

Skip the setup and use a template to get your team engaged quickly.

Click Use this template

Choose Public

What kind of team will this be?

Privacy

Private

People need permission to join

Public

Anyone in your org can join

Provide Team name and add some description and Click **Create**

Some quick details about your public team

Team name *

dynatrace

Description

Let people know what this team is all about

[Customise channels >](#)

[< Back](#)

Create

Add members in your team , otherwise skip this step

Visit : <https://www.genzgurukul.com/> for advanced Dynatrace courses

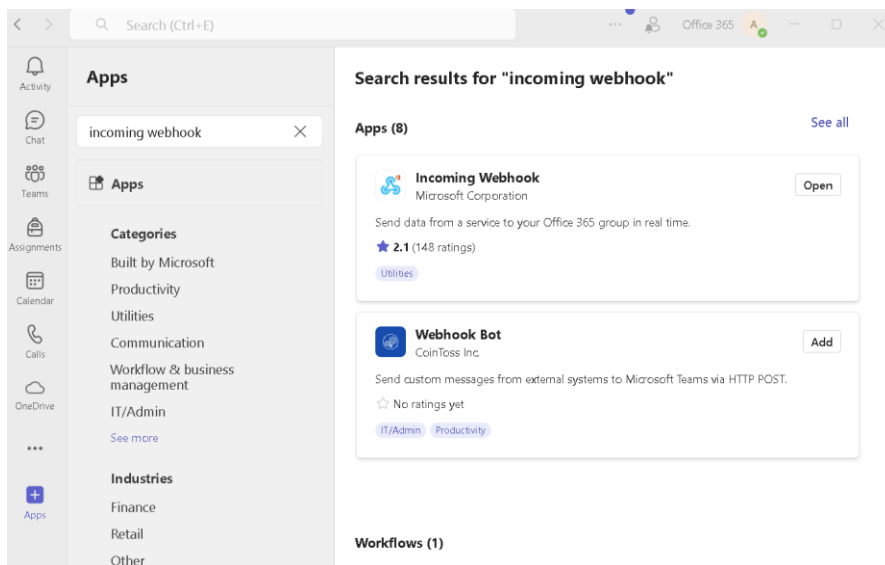

Add members to dynatrace

Start typing a name, distribution list, or security group to add to your team. You can also add people outside your organisation as guests by typing their email addresses. People outside your org will get an email letting them know they've been added. [Learn about adding guests](#)

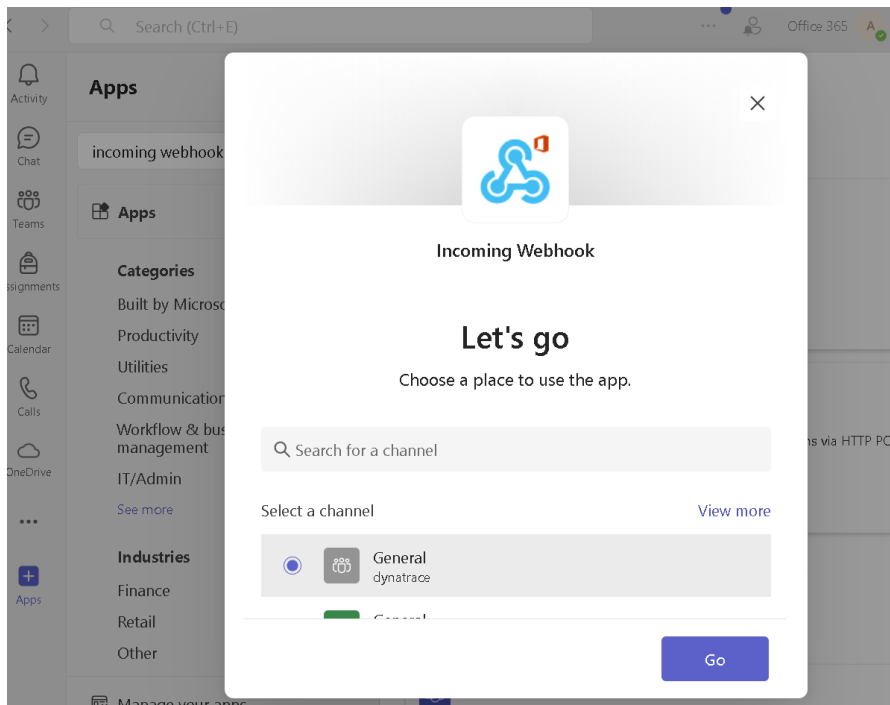

SkipAdd

Now we need to install Webhook Apps

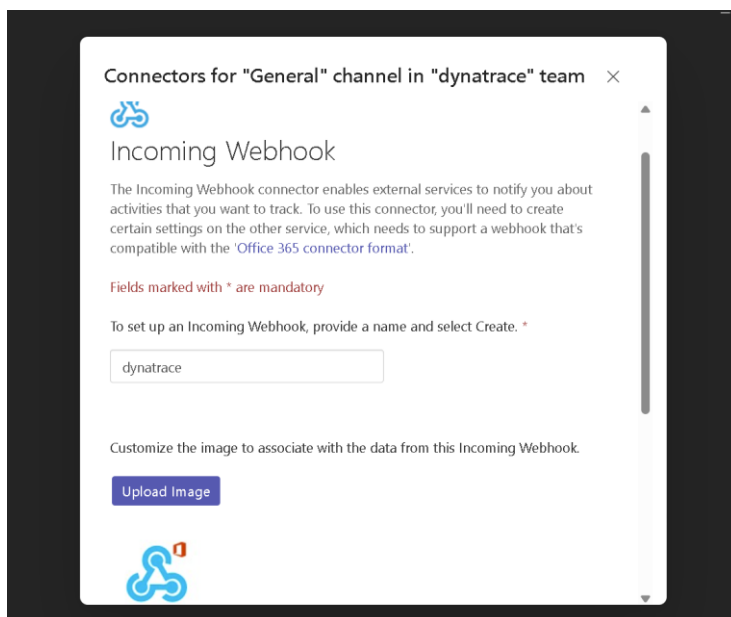

Go to Apps section and search for “incoming webhook” and Click Add

Once Installed , Open it and choose the channel :Dynatrace

Provide name and upload some image , Click CREATE

Copy the Webhook

Go Back to Dynatrace Console

Settings → integration → problem notification → custom integration

Provide the webhook url

Visit : <https://www.genzgurukul.com/> for advanced Dynatrace courses
